

Index of Multiple Deprivation 2025

The Index of Multiple Deprivation 2025 (IoD2025) was published by the Ministry of Housing, Communities & Local Government (MHCLG) on Friday 31st October 2025.

NOTE: The term Kent refers to the Kent County Council area, excluding Medway.

[Kent facts and figures](#)

The Index of Multiple Deprivation (IMD2025) is the official measure of relative deprivation in England and is part of a suite of outputs that form the English Indices of Deprivation 2025 (IoD2025). This briefing presents the initial findings for Kent & Medway.

Summary

- Because of changes to the indicators used, the population bases and the changes to geographical boundaries, comparison to previous Indices of Deprivation is limited.
- Thanet is the only local authority in Kent & Medway to be within the top 10% most deprived local authorities in England, ranking 26th in the country.
- Kent has no local authority within the 10% least deprived in the country.
- Canterbury, Dover & Tunbridge Wells have all become more deprived compared to other English local authorities since 2019 while Dartford and Swale have become less deprived.
- Almost a fifth of LSOAs in Thanet are within the top 10% most deprived areas in England.
- Tonbridge & Malling and Tunbridge Wells are the only Kent authorities to contain no LSOAs within the top 10% most deprived in the country.

Introduction

The Index of Multiple Deprivation 2025 (IoD2025) was published by the Ministry of Housing, Communities & Local Government (MHCLG) on Friday 31st October 2025.

The IoD2025 provides a set of relative measures of deprivation for neighbourhoods or small areas called Lower-layer Super Output Areas (LSOAs) across England. Each LSOA contains an average of 1,500 people. LSOAs can be aggregated to larger geographies.

The IoD2025 is based on 55 separate indicators, organised across seven distinct domains and four sub-domains of deprivation. These are combined and weighted to calculate the overall Index of Multiple Deprivation 2025 (IMD2025). The IMD2025 is the most widely used of these indices. The underlying indicators which make up each of the domains can be found on the [Ministry of Housing, Communities & Local Government website](#).

The seven domains are:

- Income deprivation
- Employment deprivation
- Health deprivation & disability
- Education, skills & training deprivation
- Barriers to housing & services
- Crime
- Living environment.

Four of the domains are further divided into sub-domains:

- Income deprivation is sub-divided to provide Income Deprivation Affecting Children Index (IDACI) and Income Deprivation Affecting Older People Index (IDAOPI)
- Education, skills & training domain is sub-divided into one relating to children and young people, and one relating to adult skills
- Barriers to housing & services is sub-divided into 'geographical barriers', which relates to the geographical (in)accessibility of key local services and amenities; and 'wider barriers' which relates to broader issues of accessibility, such as access to affordable housing and other important services
- Living environment domain is sub-divided into 'indoors' living environment which measures the quality of housing, while the 'outdoors' living environment contains measures of air quality and road traffic accidents.

There have been some significant changes to the Index of Multiple Deprivation since it was last produced in 2019. The number of indicators used to create the indices has increased from 39 in 2019 to 55 in 2025, the population bases have been revised and updated, and changes have been made to the area definitions and administrative geographies changing from 32,844 LSOAs in 2019 to 33,755 in 2025 (at district level the 317 local authorities in 2019 have decreased to 296 in 2025). The cumulative effect of these changes means that the results of IoD2025 are not directly comparable with previous versions, however some comparisons can be made, but only in terms of comparing the rankings as a snapshot in time.

MHCLG do not produce IMD to ward level, however it is possible to calculate ward level IMD following guidance from MHCLG. Tables and maps showing IMD2025 for all LSOAs and wards by Kent and Medway local authorities, including scores for each of the domains and sub-domains, are published on our [Deprivation & Poverty webpages](#) alongside this bulletin.

District level results

District level results are aggregations of the LSOA data. Aggregating the data can have the effect of hiding local areas of high/low deprivation. For instance, a district may rank within the least deprived districts in the country and yet still contain pockets of high deprivation at a local level. Similarly, a district with overall high deprivation compared to other districts may still contain areas of very low relative deprivation.

Map 1 shows the rank of the overall IMD score by national decile of Kent & Medway local authorities compare to all local authorities in England. The darker areas are those local authorities that are within the most deprived in England and the lighter local authorities are among the least deprived.

The map shows that local authorities in the southern half of the country, largely to the west of London are the least deprived compared to other local authorities in the country. There are areas within central England which are among the least deprived as are a couple of local authorities in the north of the country.

Coastal areas in general are more deprived compared to other local authorities in the country.

Table 5 in the annex at the end of this bulletin shows the overall IMD2025 score, national rank and national decile of each English local authority in England with Kent and Medway local authorities highlighted.

Map 1: Overall IMD score by national decile for all local authorities in England

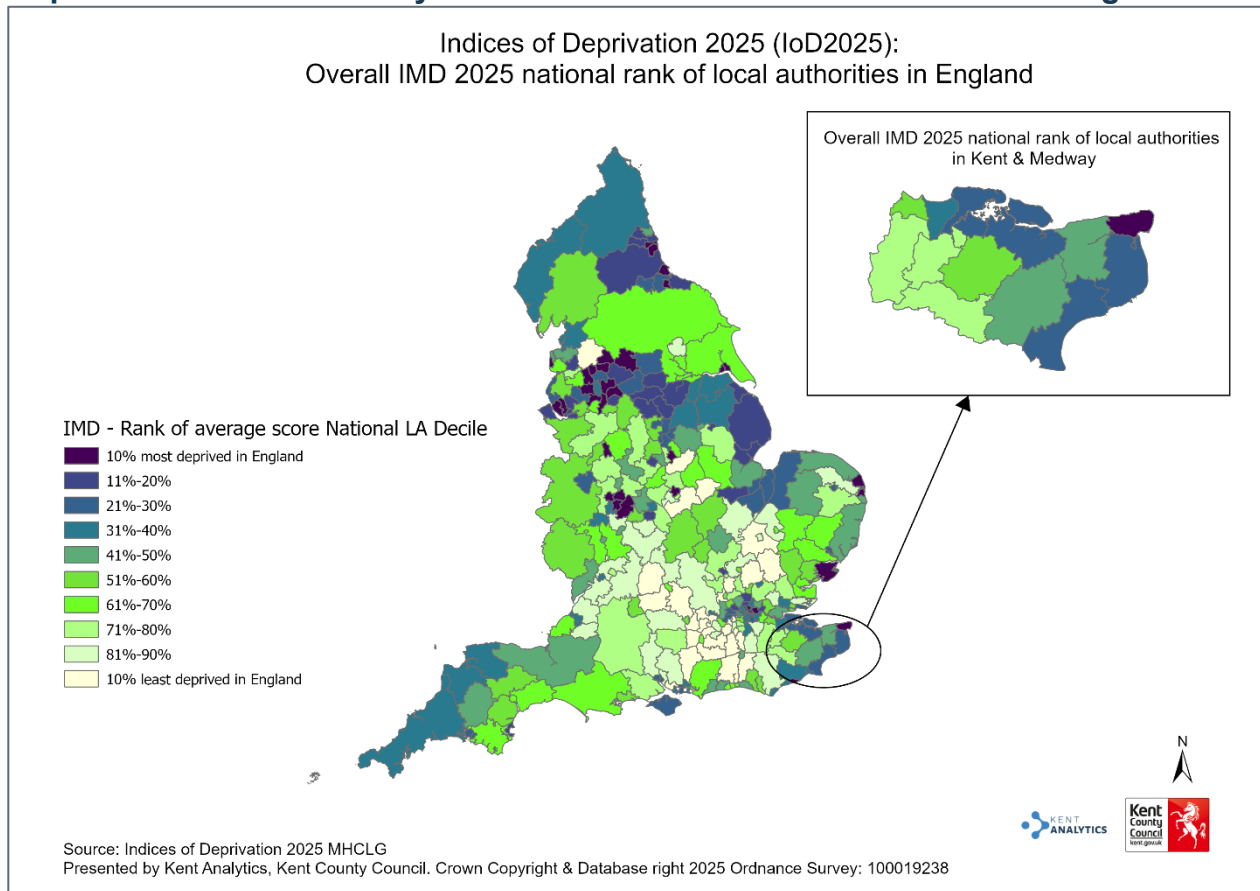

Table 1 overleaf shows the national rank of each of the Kent local authorities and Medway based on their overall IMD score and the national decile in which they sit, where 1 is the most deprived 10% of local authorities in England.

Thanet is the only Kent local authority within the top 10% most deprived local authorities in England, ranking 26th out of 296 local authorities.

Kent has no local authorities within the top 10% least deprived in the country, however Sevenoaks, Tonbridge & Malling and Tunbridge Wells are within the 30% least deprived.

The four coastal authorities of Dover, Folkestone & Hythe, Swale and Thanet, plus Medway are all within the 30% most deprived local authorities in England (decile 1 to 3).

Table 1: IMD2025: Kent & Medway local authorities

Local Authority District code (2024)	Local Authority District name (2024)	2025 rank (out of 296)	National Decile
E07000105	Ashford	139	5
E07000106	Canterbury	142	5
E07000107	Dartford	170	6
E07000108	Dover	81	3
E07000112	Folkestone and Hythe	79	3
E07000109	Gravesham	97	4
E07000110	Maidstone	160	6
E07000111	Sevenoaks	210	8
E07000113	Swale	62	3
E07000114	Thanet	26	1
E07000115	Tonbridge and Malling	233	8
E07000116	Tunbridge Wells	219	8
E06000035	Medway	85	3

National decile 1 = top 10% most deprived

Presented by: Kent Analytics, Kent County Council

Because of the changes to the IMD previously discussed, 2025 results cannot be easily compared with previous years, however we can see whether an area has moved national decile.

Table 2 overleaf shows that Thanet district is the only Kent authority to appear within the top 10% most deprived areas in the country and has remained in the top 10% over the last 10 years.

Between 2015 and 2019, seven Kent authorities became slightly more deprived compared to other local authorities in the country.

Between 2019 and 2025, when compared to all local authorities in England, three Kent districts (Canterbury, Dover and Tunbridge Wells) have all become more deprived, two local authorities (Dartford and Swale) have become less deprived and seven have remained within the same national decile. Medway has also stayed within the same national decile.

Table 2: IMD National Decile: 2015, 2019 & 2025

Local Authority District code (2024)	Local Authority District name (2024)	2015	2019	2025	2015-2019 change	2019-2025 change
E07000105	Ashford	6	5	5	-1	0
E07000106	Canterbury	6	6	5	0	-1
E07000107	Dartford	6	5	6	-1	1
E07000108	Dover	4	4	3	0	-1
E07000112	Folkestone and Hythe	4	3	3	-1	0
E07000109	Gravesham	4	4	4	0	0
E07000110	Maidstone	7	6	6	-1	0
E07000111	Sevenoaks	9	8	8	-1	0
E07000113	Swale	3	2	3	-1	1
E07000114	Thanet	1	1	1	0	0
E07000115	Tonbridge and Malling	9	8	8	-1	0
E07000116	Tunbridge Wells	9	9	8	0	-1
E06000035	Medway	4	3	3	-1	0

A negative change between 2019 and 2025 or 2015 and 2025 shows a rise in the rank therefore an increase in level of deprivation in relation to all other LAs

IMD in Kent & Medway LSOAs

Looking at the underlying Lower-layer Super Output Area (LSOA) data we can see the number and proportion of LSOAs that fall within the national deciles in 2025.

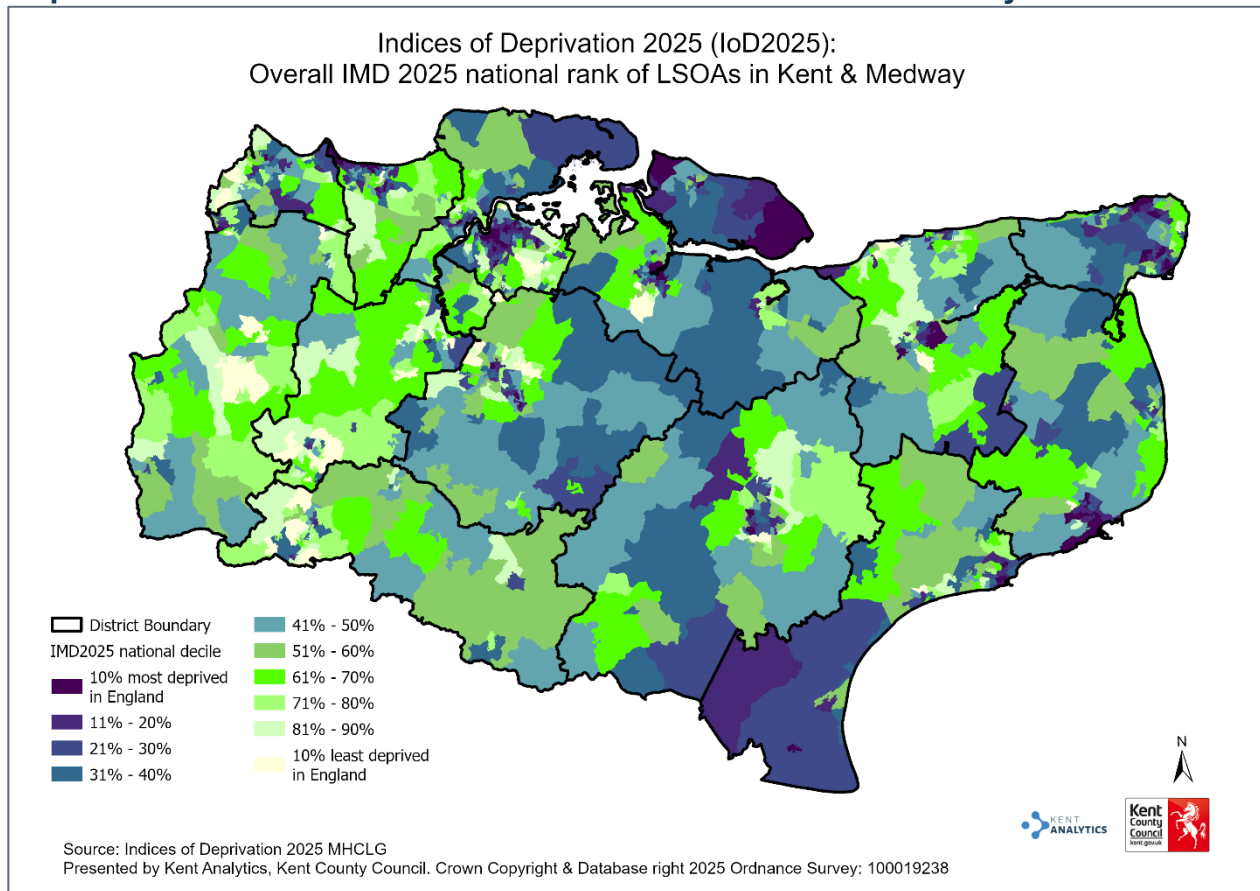

LSOAs are statistical geographies used in the UK to divide the country into areas for reporting small-area statistics and enable local level analysis. LSOAs generally contain an average of 1,500 people. The number of LSOAs has changed following the 2021 Census, with Kent increasing from 902 LSOAs in 2019 to 938 in 2025, and Medway increasing from 163 LSOAs to 169. There are currently 33,755 LSOAs in England.

Map 2 shows Kent & Medway LSOAs by overall IMD 2025 national decile. The darker areas are those LSOAs that are within the most deprived in England and the lighter LSOAs are among the least deprived.

The map shows there is an east west divide with the east of the county having higher levels of deprivation than the west.

The highest levels of deprivation can be seen in both coastal regions and urban areas.

Map 2: Overall IMD2025 national deciles: LSOAs in Kent & Medway

Overall, in Kent 7 local authorities have more LSOAs in the top 10% most deprived in England than the top 10% least deprived. Thanet has no LSOA within the 10% least deprived.

Tonbridge & Malling and Tunbridge Wells are the only Kent authorities to have no LSOAs within the top 10% most deprived in England.

With 18.6%, Thanet has the highest proportion of LSOAs in the top 10% most deprived (16 out of 86 LSOAs), followed by Swale with 14.4% (13 out of 90 LSOAs).

Tonbridge & Malling has the highest proportion in the 10% least deprived in the country (20.5%, or 16 out of 78 LSOAs). Sevenoaks has the second highest proportion with 17.3% (13 out of 75 LSOAs).

Table 3 shows the proportion of LSOAs within each local authority in Kent & Medway by national decile. Those in decile 1 are within the 10% most deprived LSOAs in England.

Table 3: Proportion of Kent & Medway LSOAs by national decile: IMD 2025

Area	1	2	3	4	5	6	7	8	9	10

National decile 1 = top 10% most deprived

Source: English Indices of Deprivation 2025 MHCLG

Presented by: Kent Analytics, Kent County Council

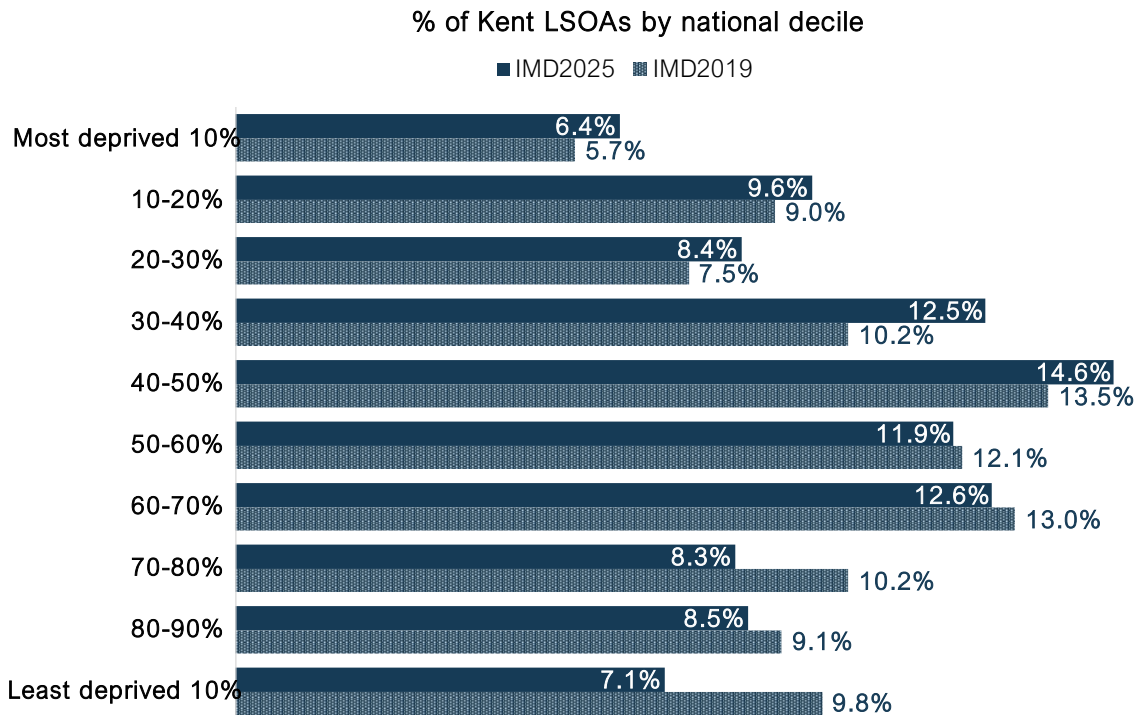

In 2025 a higher proportion of LSOAs in Kent were in the lower deciles (those with highest levels of deprivation) while a lower proportion were in the higher deciles (those with lowest deprivation).

Because of the change in number of LSOAs we cannot compare change in rank between 2019 and 2025 however we can show the proportion of LSOAs by decile in 2025 compared to 2019 in Kent, and Kent and Medway combined.

In 2025 there is a higher proportion of LSOAs within the top 10% most deprived in the country than was seen in 2019, while there is a lower proportion within the top 10% least deprived.

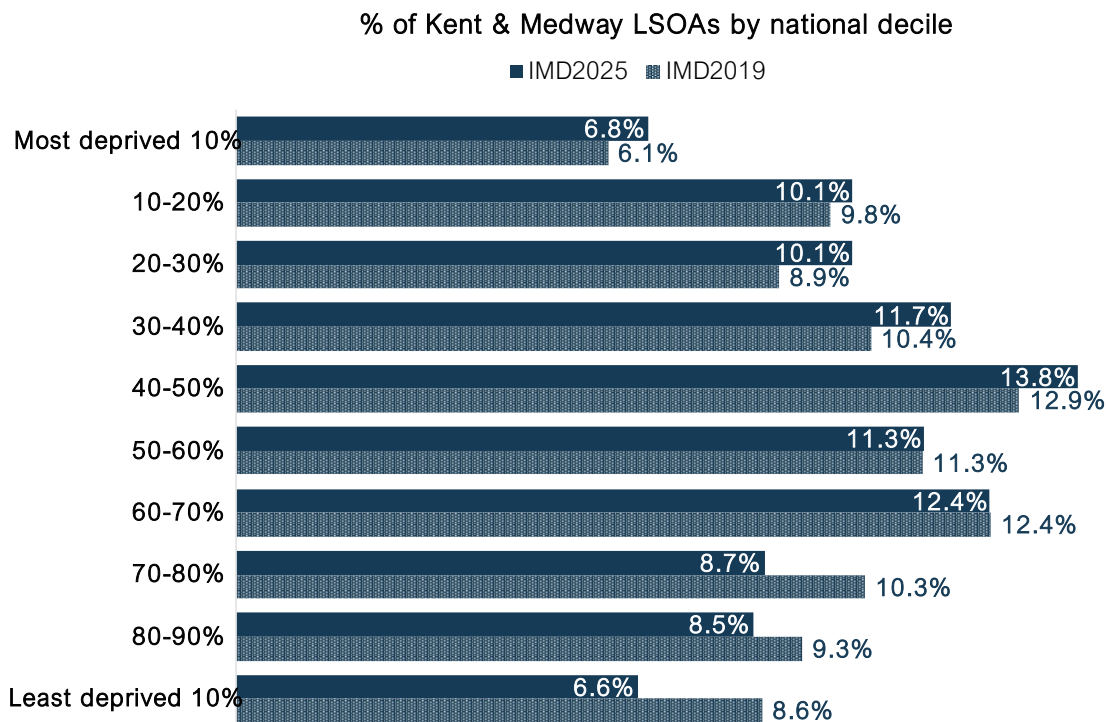

Chart 1 shows the change in proportion of Kent LSOAs by national decile in 2025 compared to 2019, chart 2 shows the same for Kent & Medway combined.

Chart 1: Proportion of Kent LSOAs by national decile: IMD 2025 & 2019

Presented by: Kent Analytics, Kent County Council

Table 4 spread across the following pages shows the top 10% of LSOAs within Kent with the highest deprivation. The table also shows which district and ward they are in, whether they are classed as urban or rural wards, and whether they are within the top 10% most deprived local areas in the country.

The table shows that the majority of LSOAs in the top 10% most deprived in Kent are classified as urban areas (96.5% or 83 out of 86 LSOAs), 3 of the top LSOAs are classed as larger rural areas (3.5%) and none of the LSOAs within the top 10% in Kent are classed as smaller rural areas.
